(1) The Morgan Joseph Acquisition Company Index, MJACI, is a total SPAC market index (January 1, 2005 base of 100) that measures the daily market performance of all acquisition companies formed since August 2003. MJACI is market capitalization weighted (excluding promote shares and over-allotments). MJACI adds newly formed public acquisition companies at their initial offer price and removes an existing acquisition company upon consummation of a business combination. In either event, index weightings are linearly rebalanced.

(2) Excludes warrants trading below \$0.05

(2) Assumes extension of expiration date for executing a letter of intent, agreement in principle or definitive agreement with potential acquisition.

(3) As reflected by the issuers' most recent 10-Q or 10-K. May not reflect accrued taxes or other expenses that may be payable by the trust.

(4) The implied yield to maturity calculation is the discount yield from the last market price of the stock to one month after the expiration date of the trust. The inputs for the estimated trust value at expiration are as follows:

Amount in trust (as provided by latest filing), assumed interest rate on trust (current 3MO TBill is presently selected), assumed corporate tax rate of 35% if US domestic corporation, 0% if in offshore tax haven (unless specified elsewhere), the amount deducted for working capital.

The trust balance at the end of each monthly period is calculated as: interest earned on trust - taxes calculated on new interest - amount deducted for working capital + principal

(1) In cases where there is no unit or warrant price, return reflects unit offer price plus warrant exercise proceeds relative to current synthetic unit price

(b) Synthetic unit represents the sum of the prices of one share and one/two warrants; if there is no current warrant price, assumes exercise of warrant by IPO investor

*Morgan Joseph makes a market in the securities of this issuer.

Note: *CAPS ITALICS* indicates Morgan Joseph & Co. Inc. lead-managed SPAC

(3) As reflected by the issuers' most recent 10-Q or 10-K. May not reflect accrued taxes or other expenses that may be payable by the trust.

Trust Per Share value does not reflect the impact of deferred underwriters' commission, which may be deducted from the pro rata portion of the trust account payable to redeeming shareholders.

Note: The implied yield to maturity calculation is the discount yield from the last market price of the stock to one month after the expiration date of the trust. The inputs for the estimated trust value at expiration are as follows:

Amount in trust (as provided by latest filing), assumed interest rate on trust (current 3MO TBill is presently selected), assumed corporate tax rate of 35% if US domestic corporation, 0% if in offshore tax haven (unless specified elsewhere), the amount deducted for working capital.

The trust balance at the end of each monthly period is calculated as: interest earned on trust - taxes calculated on new interest - amount deducted for working capital + principal
